Home for the Distressed Quarantine Cabin Passengers.

The Hamburg-American Steamship Wladan Arrives With Sickness.

Yellow Flag Again Hoisted on Board the Steamship Wladan—Figures Showing the Plague's Complicated Date in New York Waters.

WASHINGTON, Sept. 10.—A dispatch was received from the war department Friday morning from the president directing that a portion of the government reservation at Sandy Hook be turned over to the treasury department as a station for the detention of passengers now on the ships in the lower bay at New York harbor. The president based his action on representation made to him by Secretary Foster and Secretary Tracy.

The news telegraphed from Sandy Hook and quarantine Friday morning is to the effect that the Hamburg-American line steamship Wladan, which passed Sandy Hook shortly after 6 o'clock Friday morning, reached the lower bay at 7:15 and there anchored and hoisted the yellow flag, indicating that she has sickness, probably cholera, on board.

The Wladan is not one of the first class steamers of the Hamburg-American line, but is a vessel of about the same size and build as the Ruga, which is now in lower quarantine. The Wladan, however, like the Ruga, carries both cabin and steerage passengers, and no doubt has her usual full complement of the latter.

In addition the yellow flag has also again been hoisted on board the steamship Wladan, where so many sailors passengers are detained in spite of the fact that the scourge seems to be attacking the steamship's crew and steerage passengers alone.

It is therefore a relief to know that Sandy Hook also photographs that the dreaded flag was not hoisted Friday morning on board the Ruga or the Moravia, and hopes are entertained that there will be no further extension of the disease on board of these two steamers.

The White Star steamer Britannia, from Liverpool, also photographed the Hook Friday morning and as she did so the signal "report me all well" was fluttering from her signal halyards.

Though this news of the cholera ship in port increases the gravity of the situation at quarantine, there is no alarm felt in official circles here, and the health authorities still feel confident of being able to keep the dread invader from landing on our shores.

The cholera record up to Friday morning, without counting the cases which may be announced Friday, is as follows: New cases Thursday, 10; total deaths in this port, 15; total deaths on passage to this port, 31; sick and under treatment, 16. These totals can in turn be distributed in the following manner:

Moravia—Deaths at sea, 1; in port, total, 2; sick, 2; total cases, 3.

Northern—Deaths at sea, 3; in port, total, 4; sick, 2; total cases, 7.

Totals—Deaths at sea, 3; in port, 15; total deaths, 46; sick, 40; total cases, 86.

Dr. Jenkins said Thursday night that there had been no new cases of cholera on the Moravia for several days, and he is confident that the disease has been stamped out aboard this ship.

Of course there have been and will be rumors started that cases of cholera discovered in this city, but the health board is pledged to announce to the public the first case of Asiatic cholera which is discovered here and in its daily bulletins, now issued every morning and evening, the board denies that a case of genuine cholera has been discovered here.

WASHINGTON, Sept. 10.—The war department has issued a circular for the information and guidance of medical officers who may be familiar with the general management and prevention of cholera, and for others who have received no specific instructions from medical directions.
